

We help companies innovate, develop, and manufacture new medical device technologies. From phase zero through production, our team of highly skilled engineers will work with you to transform your idea into a clinical success.

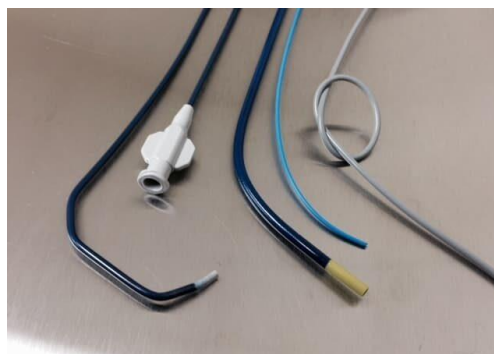

Services

- Concepts, prototypes, feasibility
- Design and development
- Regulatory Affairs, QMS
- Verification & Validation Testing
- Manufacturing

Technologies

- Complex Delivery Systems, Steerables
- Smart Catheter Technologies
- Balloon Systems
- Implantables
- ElectroPhysiology Devices
- Gene Therapy Delivery Systems

Capabilities

- Braiding & Coiling
- Reflow & Lamination
- Extrusion
- Balloon forming
- Tipping/forming/curving
- 3D Printing
- Niti forming/processing
- Laser Welding
- Micro-soldering
- Resistance Welding
- Insert Molding
