

MAKER SPACE

CathTeam offers a fully-equipped catheter development lab designed for rapid prototyping, hands-on process development, and technical collaboration.

READY TO ACCELERATE YOUR NEXT CATHETER DESIGN?

YOUR PARTNER IN CATHETER DESIGN & MANUFACTURING

WWW.CATHTEAM.COM

CATHETER DESIGN SOFTWARE

Tools that enable R&D engineers to design catheters and their components to their desired specifications. Then aid in ordering the right materials, sizes, and tolerances the first time.

ENGINEERING CONSULTING

Leverage CathTeam's expertise in catheter design, process development, and manufacturing to reduce iterations, cut costs, and accelerate your device timeline.

Catheter Design Expertise

Working on your next delivery system and need design, process development, or manufacturing expertise? Our team has worked on hundreds of catheters from multilumen to steerables.

Catheter Samples

Need samples made for your next animal lab or benchtop test? We can make the parts, all designs and processes are shared with you!

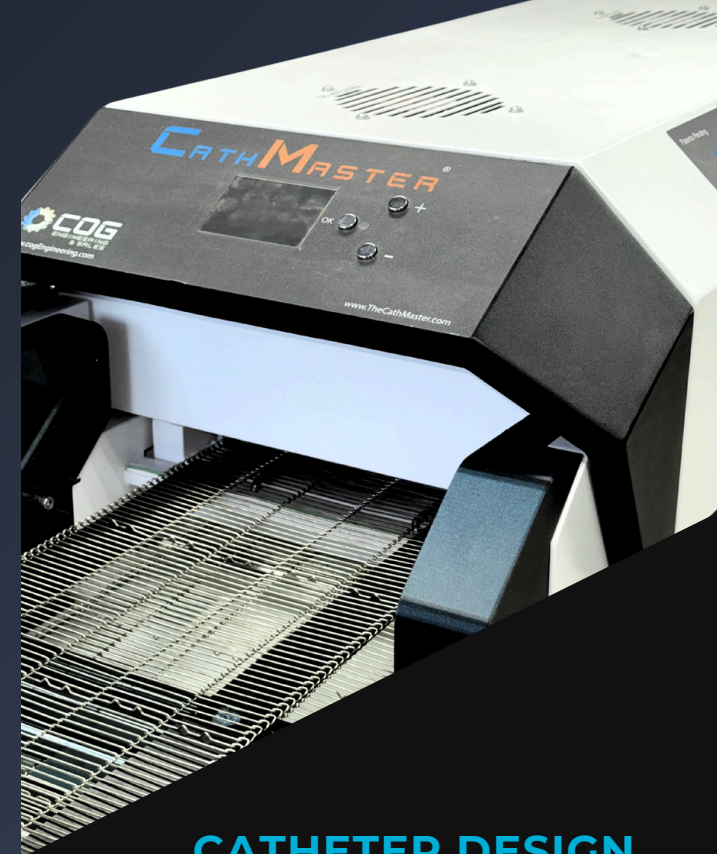

Process Development

Trying to develop a process or need assistance on a machine? We are uniquely suited to help you develop your process with our in house equipment and expert team.

Manufacturing Transfer

Want to bring a design or process in house or transfer it to a contract manufacturer? With our expertise, we can facilitate this process and share all the details!

CATHETER DESIGN & MANUFACTURING TRAININGS

CathTeam offers equipment-based training built for catheter engineers, technicians, and operators.

Whether you're learning fundamentals or optimizing a production line, our trainings combine technical design principles, hands-on equipment operation, and process development—all under one roof.
